### Profile

I am currently pursuing an undergraduate degree in Information Technology specializing in Data Science. My goal is to secure a position within a reputable company where I can effectively utilize my skills and contribute to the growth of the company while expanding my knowledge.

Known for my work ethic, I am a hard-working individual who consistently strives for success. As a team player, I understand the value of collaboration and adaptability which allow me to thrive in challenging times.

### General Skills

Leadership

Analytical thinking

## Technical Skills

Programming in C	<div><div></div></div>	HTML 5	<div><div></div></div>
CSS 3	<div><div></div></div>	PHP	<div><div></div></div>
MySQL	<div><div></div></div>	Java	<div><div></div></div>
Star UML	<div><div></div></div>	JavaScript	<div><div></div></div>
MERN Stack	<div><div></div></div>	Kotlin	<div><div></div></div>
Android Studio	<div><div></div></div>	R	<div><div></div></div>

## Projects

01-2023 – present	<b>Clinic Management System</b> <a href="#"></a> This system will be able to make appointments, manage patient details, and monitor patient traffic on clinic premises. The project group consisted of eight members, led by me. We developed this system using the MERN stack (MongoDB, ExpressJS, ReactJS, and NodeJS).
02-2023 – 05-2023	<b>Utility Insight Mobile Application</b> <a href="#"></a> This app will be able to track domestic usage of electricity, water, and gas. The project group consisted of four members. We developed this system using Kotlin and XML.
07-2022 – 11-2022	<b>Online Bus Ticket Reservation System</b> <a href="#"></a> The system allows users to reserve tickets for buses. This was done by a group of four members, led by me. We used Java, MVC architecture, and object-oriented concepts as well.

## Extra-Curricular

02-2021 – present	<b>Josephian Rover Crew</b> <i>Public Relations Coordinator</i>	Colombo, Sri Lanka
